

Directions: You may print this out and complete or create the graphs on a separate sheet of paper. When you are done, upload a picture and submit in the assignment form titled Supply Graphing Assignment.

-Read the scenario.

-Name the shifter.

-Graph what will happen to the supply curve based on the scenario. Label S1 and S2 and Q1 and Q2. Use the dotted line at a generic price point to demonstrate that the shift has nothing to do with a price change in the market.

Another shoe store opened in the mall. What happens to the supply of shoes?

Shifter:

A gigantic snowstorm wiped out fields of soybean crops. What happens to the supply of tofu?

Shifter:

The tortilla machine at Chevy's breaks. How is the supply of burritos impacted?

Shifter:

Mountain Mike's closes down in Weston Ranch. What happens to the supply of pizza?

Shifter:

The price of flour is at an all time high. What happens to the supply of pizza?

Shifter:

You just purchased a new pizza oven that cooks in 1/2 the time! What happens to the supply of pizza?

Shifter:
